An Integrated Model of Transport and Urban ... - SpringerLink

Abstract. By the year 2000, more than half of the world's population will live in cities. This means that not only an extensive exchange of population, goods and information in a globalised world can be expected but also that the transport of goods, population and information must be effectively managed.

Development of Integrated Urban System Models: Population ...

This research presents the development of a life-oriented, agent-based integrated transport land use and energy (ITLE) model. A life-oriented theory and perspective is adopted to accommodate life-trajectory dynamics of key longer-term household-level decisions within the integrated urban modelling system.
