Beginning Portable Shell Scripting: From Novice to ...
Book Description: Portable shell scripting is the future of modern Linux, OS X, and Unix command line access. Beginning Portable Shell Scripting: From Novice to Professional teaches shell scripting by using the common core of most shells and expands those principles to all of scripting.

bash Variables with hex 0a on the end - Experts Exchange

Shell Scripting, Shell Scripting Perl, Perl bash Variables with hex 0a on the end. I am getting data in bash and storing it in Variables. Half the time I get the string, the other half of the time I get the string terminated with hex 0a on the end if I pipe it to hexedit -C is there an easy way to strip this from the variable with a \$(varname,) or something like it ?

Portable shell scripting is the future of modern Linux, OS X, and Unix command line access. Beginning Portable Shell Scripting: From Novice to Professional teaches shell scripting by using the common core of most shells and expands those principles to all of scripting.

shell script - Add lines to the beginning and end of the ...

There is no way to insert data at the beginning of a file - all you can do is create a new file, write the additional data, and append the old data. So you'll have to rewrite the whole file at least once to insert the first line. You can append the last line without rewriting the file however.

How to insert text before the first line of a file? - Unix ...

If a shell which accepts the '\$' syntax is in use, you may insert the newline directly, so sed sees that the newline is already there: `$ sed -i $'1s/^/new_text\n/' file_name`
Which works for more sed versions.
