The Sixth International Arnold Rikli Symposium on the Biologic Effects of Light was held in Boston, Massachusetts from June 16th - 18th, 2001. The goal of this Symposium was to focus on the very popular practice of tanning either by sunlight or by artificial light sources and the overall impact this practice has on health and disease. The program was organized by members of the Scientific Advisory Committee and my co-chair emeritus, Professor Ernst G. Jung. The Program Committee organized an

As humans ventured into the twentieth century, the industrialized countries were confronted with the scourge of rickets. Although solariums were becoming common in the early 1900s and phototherapy was gaining popularity as a result of the awarding of a Nobel Prize to Finsen in 1903, it wasn't until

Biological effects of light The effect of light on biological rhythm depends, among other things, on the intensity, duration, time of day, and the spatial distribution of light.

Thereby, light can have both a fatiguing as well as stimulating effect, and can cause other physical symptoms. **BIOLOGIC EFFECTS OF LIGHT 2001 PDF - s3.amazonaws.com**

What are the main Biological Effects of Light?

What are the main Biological Effects of Light? 1. Effect on Metabolism. The absorption of light rays of the visible part of spectrum has little effect on organisms. The violet and ultraviolet rays are harmful and produce photochemical changes in the organisms and, therefore, influence their metabolism. The intensity of solar radiation affects living organisms at different latitudes and seasons. **Biologic Effects of Light 2001 eBook by - 9781461509370 ...**
