Slide the box joint jig a bit to the right, using the remaining portion of the spacer block that you cut off in the previous step to adjust the width of the jig. See the image above for clarification. With the jig positioned so that the installed spacer block is now precisely one box joint finger's width past the dado blade, re-attach the backer block to the miter gauge using the two screws.

Box (finger) Joint Jig: 9 Steps (with Pictures)

An interesting point that the box joint is stronger than the dovetail joint, and does not require the custom dovetail jig. Instead, you can create this one with scraps and belt out box joints all day long. Strength test was done at

Table Saw Box Joint Jig | Jays Custom Creations

This is the third table saw box joint jig I've made. The first one was for a dado blade and was something simple and temporary. I don't recall what I did with it or where it ended up. The second one was specific to my last table saw and when I gave that saw away all of the jigs specific to it.
