[Case Study Methodology - psyking.net](#)

The case study should have a case which is the object of study. The case should be a complex functioning unit, be investigated in its natural context, with a multitude of methods, and be contemporary. Nevertheless, the case study researchers mentioned above emphasise different features. Robert Stake (1998) points out that crucial to case study research are not the

### Writing a Case Study - Organizing Your Social Sciences ...

The term case study refers to both a method of analysis and a specific research design for examining a problem, both of which are used in most circumstances to generalize across populations. This tab focuses on the latter--how to design and organize a research paper in the social sciences that

#### Case study - Wikipedia

In the social sciences and life sciences, a case study is a research method involving an up-close, in-depth, and detailed examination of a subject of study (the case), as well as its related contextual conditions.

#### Case Study Research Design - How to conduct a Case Study

The case study research design is also useful for testing whether scientific theories and models actually work in the real world. You may come out with a great computer model for describing how the ecosystem of a rock pool works but it is only by trying it out on a real life pool that you can see if it is a realistic simulation.
