Space is big. No, really, space is effing big. If you ever wondered just how effing big space is, let's shrink the distances a moment: if the sun was the size of a grain of salt (making the earth thousands of times tinier still) the next three grains of salt, in the Alpha Centauri system, would still be seven miles away.

Centauri Dreams was a fun book for the futurist some time ago. The book enables the reader to let go into the future and think about interstellar space travel. The book is well structured and enlightening to the non-scientist and non-engineer. The technologies the author discusses are being researched but the practical applications will be years, decades, perhaps centuries, into the future for
