Books on conifer reproduction are all too rare. The only major work in the last generation was Hardev Singh's 1978 *Embryology of Gymnosperms*, a book that summarized the previous century's work. Being a book primarily about embryology, it stopped short of putting conifer reproduction in a genetic or evolutionary context.

Conifer reproduction has been the subject of mythology, art and religious practices and this continues unabated. Today, conifers still inspire poetry, state flags, township names and postage stamps. The book includes a few anecdotes which go to this point but the reader is encouraged to explore further. Acknowledgements.
