The overall goal of this book is to increase the size of and more widely disseminate the "portfolio" of research and other works aimed at protecting and sustainably utilizing biodiversity of global significance in arid and semiarid areas in developing nations.

[Conserving dryland biodiversity: Science and policy](#) Drylands (arid and semi-arid areas) cover approximately 40 per cent of the Earth's land surface. Although they are not as species-rich as more temperate or humid regions,

they are home to many endemic species uniquely adapted to arid conditions. But much of this natural biodiversity is fragile, and

CONSERVING BIODIVERSITY IN ARID REGIONS - Springer

CONSERVING BIODIVERSITY IN ARID REGIONS Best Practices in Developing Nations edited by John Lemons University of New England Biddeford, ME, U.S.A.,

Biodiversity in arid regions: values and perceptions ...
With their modest rainfall, arid regions are characterized by relatively fewer species than the better-watered biomes. But this makes it all the more important that the biodiversity that is present in arid environments be given even higher priority; for each species lost from an arid region, the percentage of loss for the region's biodiversity

Biodiversity of Deserts and Arid Regions LIA
Biodiversity of Deserts and Arid Regions Climate change predictions forecast significant warming and increase of aridity conditions for Sahara Sahel and other bordering areas of current deserts. Thus, the Mediterranean and the Sahel are upfront desertification areas where biodiversity research is urgent.

Conserving Biodiversity in Arid Regions - Google Books

On the eve of the World Summit for Sustainable Development (WSSD), held in autumn 2002 in Johannesburg, South Africa, United Nations Secretary General Kofi Annan recommended five specific areas as focal points of discussion for the global forum: Water, energy, health, agriculture and biodiversity.

Impact of Grazing Intensity during Drought in an Arizona ...

A precautionary approach to conserving biodiversity may warrant the application of multiple strategies to achieve greater landscape heterogeneity (Christensen 1997; Wiens 1997). Fuhlendorf and Engle (2001) recommend a landscape scale approach that applies a heterogeneous patchwork of disturbance, such as grazing or fire, followed by periods of rest.
