[Endocrine Therapy for Breast Cancer: Johns Hopkins Breast ...](#)

Endocrine Therapy Women who have been diagnosed with estrogen receptor-positive breast cancer will often be prescribed daily oral medication after all other treatment ends. Endocrine therapy is prescribed differently for women, depending on whether they are premenopausal or postmenopausal.

[Hormone therapy for breast cancer - Mayo Clinic](#)

Hormone therapy for breast cancer is a treatment for breast cancers that are sensitive to hormones. The most common forms of hormone therapy for breast cancer work by blocking hormones from attaching to receptors on cancer cells or by decreasing the body's production of hormones. [Endocrine Therapy for Breast Cancer: Johns Hopkins Breast ...](#)

Postmenopausal women with hormone receptor positive breast cancer may be offered adjuvant therapy with either tamoxifen or with an aromatase inhibitor. Aromatase inhibitors belong to a class of drugs that work by reducing the levels of estrogen in the body. Even if you have stopped menstruating.

[Hormonal therapy for breast cancer - Canadian Cancer Society](#)

Hormonal therapy is sometimes used to treat breast cancer. It is a treatment that adds, blocks or removes hormones.

Hormones are substances that control some body functions, including how cells act and grow. Changing the levels of hormones or blocking certain hormones can slow the growth and spread of breast cancer cells. Drugs, surgery or radiation therapy can be used to change hormone levels or block their effects.

[Hormone Therapy for Breast Cancer: Purpose, Risks, Drugs ...](#)

Hormone therapy, also called endocrine therapy, adds, blocks, or removes those chemicals to treat the disease.

There are two types of hormone therapy for breast cancer: [Endocrine therapy of breast cancer - researchgate.net](#)

Endocrine therapy of breast cancer consists of a variety of both medical and surgical ablative treatment modalities, but ablative therapy is increasingly replaced by medical treatment. Most

[Hormone Therapy for Breast Cancer Fact Sheet - National ...](#)

Hormone therapy (also called hormonal therapy, hormone treatment, or endocrine therapy) slows or stops the growth of hormone-sensitive tumors by blocking the body's ability to produce hormones or by interfering with effects of

hormones on breast cancer cells.

Endocrine Therapy for Breast Cancer: A Model of Hormonal ...

Endocrine therapy is the mainstay of treatment of ER-positive breast cancer, with established clinical utility in advanced disease and in the adjuvant and neoadjuvant settings. Rational combination of endocrine therapy with ovarian suppression and newer targeted therapies has maximised efficacy in specific patient subgroups.

Endocrine therapy in the years following a diagnosis of ...

Prescriptions of endocrine therapy during April-July 2015 among women diagnosed with breast cancer in England during 1995-2015. This figure presents the prescribing of endocrine therapy by ER status and time since diagnosis in Panel A. Panel B presents the prescribing of endocrine therapy by time since diagnosis in ER+ve women.

Hormone Therapy for Breast Cancer in Men

Hormone Therapy for Breast Cancer in Men Hormone therapy (sometimes called endocrine therapy) is a way to treat cancer by using hormones or drugs or other treatments that affect hormones. Hormone therapy is a form of systemic therapy, like chemotherapy .

Hormone Therapy for Breast Cancer | American Cancer Society

Hormone therapy is a form of systemic therapy, meaning it reaches cancer cells almost anywhere in the body and not just in the breast. It's recommended for women with hormone receptor-positive (ER-positive and/or PR-positive) breast cancers, and it does not help women whose tumors are hormone receptor-negative (both ER- and PR-negative).

Hormone Therapies for Breast Cancer Treatment | Susan G ...

Hormone therapies used in breast cancer treatment act as anti-hormone or anti-estrogen therapies. They block hormone actions or lower hormone levels in the body. MHT is used to increase hormone levels in the body to treat menopausal symptoms.

Breast Cancer: Types of Treatment | Cancer.Net

Hormonal therapy, also called endocrine therapy, is an effective treatment for most tumors that test positive for either estrogen or progesterone receptors (called ER-positive or PR-positive; see Introduction). This type of tumor uses hormones to fuel its growth. Blocking the hormones can help prevent a cancer recurrence and death from breast cancer when used either by itself or after

Breast Cancer | ASCO

ASCO's Targeted Agent and Profiling Utilization Registry (TAPUR) Study is a non-randomized clinical trial aiming to describe the performance of commercially available, targeted anticancer drugs prescribed for treatment of patients with advanced cancer with a potentially actionable genomic variant.

Hormonal therapy - Canadian Cancer Society

Hormonal therapy is a treatment that adds, blocks or removes hormones to slow or stop the growth of cancer cells that need hormones to grow. Hormonal therapy is also called hormone withdrawal therapy, hormone manipulation or endocrine therapy.
