[High-performance liquid chromatography - Wikipedia](#)
High-performance liquid chromatography (HPLC; formerly referred to as high-pressure liquid chromatography) is a technique in analytical chemistry used to separate, identify, and quantify each component in a mixture.

[High Performance Liquid Chromatography - an overview ...](#)

High performance liquid chromatography guarantees a high sensitivity and, at the same time, this technique has its gas analogue. The principle of HPLC is the same as that of liquid chromatography (LC), liquid solid chromatography (LSC) and liquid liquid chromatography (LLC). High performance liquid chromatography is the most recent technique.
