[How To Install Brake Pads - 10 Easy To Follow Steps!](#) Installation Steps. If your car makes an annoying squeal when you press the brake pedal or you need more stopping power, you probably need to swap in a new set of brake pads.

[Installation Guide: Front Brake Pad - Power Stop](#)

A disc brake assembly is composed of a caliper, two brake pads, and a rotor. The caliper works on pressurized brake fluid through a piston in the caliper. The caliper mounting bracket is bolted to the spindle, and holds the brake pads in position relative to the brake rotor. The caliper fits over the pads and is fastened to the brackets with special sliding bolts. These bolts usually have dust

[How to Change Front Brake Pads - The Family Handyman](#)

Changing front brake pads is simpler than replacing rear disc brakes, and if you have experience doing basic repairs the job will take about 4 hours.

[How to Replace Honda Brake Pads | AxleAddict](#)

When you start to replace the brake pads, you will notice the piston in the caliper is extended out because the old pads had less brake material on them than the new ones do. The piston's job is to push the pads against the rotors; the thinner the brake pad material, the more the piston has to extend itself.
