[Multiple Sclerosis \(MS\) Symptoms, Causes, Treatment, Life ...](#)

Multiple sclerosis (MS) is thought to be an autoimmune disease; however, the exact cause is not known. Early signs and symptoms of MS are fatigue, bladder and bowel problems, vision problems, and numbness, tingling, or pain in certain areas of the body. There is no cure for MS, however, the symptoms can be managed with medication and therapies. Most people with MS live a normal life span.

[MS Prognosis and Life Expectancy: What You Need to Know](#)

When it comes to the prognosis for multiple sclerosis (MS), there's both good news and bad news. Although no known cure exists for MS, there is some good news about life expectancy.

[My Life with Multiple Sclerosis - Your Workplace](#)

My Life with Multiple Sclerosis. January 1, 2016. BY: Vanessa Byrd. Share. Six years ago, I was just like every other millennial struggling to make a name for myself. Then, I was diagnosed with multiple sclerosis. Back in 2009, I was a pretty typical 25-year-old. I had nearly completed my Bachelor's degree in history and like many Millennials, I was anxious to find my perfect career path. I

Multiple sclerosis, or MS, is a disease of the central nervous system that can cause symptoms throughout the body. Most experts believe it is an autoimmune condition, in which the immune system

[Multiple Sclerosis Prognosis and Life Expectancy ...](#)

In multiple sclerosis (MS), the immune system attacks and destroys the fatty myelin coating that surrounds and insulates nerve cells in a process known as demyelination. MS is a lifelong condition.

[Multiple Sclerosis - Canada.ca](#)

Multiple sclerosis (MS) is a disease of the central nervous system. The immune system attacks myelin (protective covering of the nerves) in the brain, spinal cord, and optic nerves, which disrupts communication between the central nervous system and the rest of the body.

[Tips for Living with Multiple Sclerosis: Care, Management ...](#)

When you get an illness like bronchitis or the flu, you know you'll be feeling better and back to normal within a week or so. A long-lasting condition like multiple sclerosis is different.

#### **What is MS? MS Society of Canada**

Canada has one of the highest rates of multiple sclerosis (MS) in the world, with an estimated 1 in every 385 Canadians living with the disease. While it is most often diagnosed in young adults aged 20 to 49, younger children and older adults are also diagnosed with the disease.

#### **Multiple sclerosis - Wikipedia**

Multiple sclerosis (MS) is a demyelinating disease in which the insulating covers of nerve cells in the brain and spinal cord are damaged. This damage disrupts the ability of parts of the nervous system to communicate, resulting in a range of signs and symptoms, including physical, mental, and sometimes psychiatric problems.
