Melodious and Progressive Studies, Book 1: Clarinet; David ...

A few of the pieces are melodious, but mostly it is scales and arpeggios. As an add on for technical studies, it is OK and does hit all the keys, but there is no great joy in playing these pieces for the most part. When I need a break from the purely technical, I would rather play well recognized pieces and transcriptions. Generally, this is a very dry book. Not sure it is worth the cost.

Melodious and Progressive Studies, Book 1: Saxophone ...

I'm a beginner and I was looking for a book with a lot of music to practice with. I had a similar book from my high school days when I played flute and looked up the saxophone version and I'm very pleased.
