Nucleation and Atmospheric Aerosols 1996 | ScienceDirect

Water nucleation on atmospheric aerosols is strongly influenced by an insoluble core. Gorbunov and Hamilton obtained the expressions for the free energy of embryo formation in the case of multiple nucleation on aerosol particles that contain both soluble and insoluble substances. In the chapter, their approach is applied to describing water nucleation on complex aerosol particles that contain

atmospheric nucleation i.e. formation of ~1 nm particles - in many cases (Kulmala et al., 2000), the exact routes for formation of 3 nm particles are still unclear, because besides nucleation, also the growth from 1 nm size to 3 nm size is needed. In order to be able to understand the formation and growth processes of atmospheric aerosols and cloud droplets their thermodynamic properties
