Authors: Nussbaum, Sven, Menz, Gunter Free Preview: New object-based methodology breaking with the pixel paradigm; New methodologies for pre-processing, feature analysis, classification and change detection; Satellite images of Iranian nuclear facilities

Object-Based Image Analysis and Treaty Verification - New ...

A comprehensive workflow and newly developed algorithms for object-based high resolution image (pre-) processing, feature extraction, change detection, classification and interpretation are developed, applied and evaluated. The entire analysis chain is demonstrated with high resolution imagery acquired over Iranian nuclear facilities.

Object based image analysis for remote sensing - ScienceDirect

In conclusion, starting from around the year 2000 we can document a sharp increase in the usage of image segmentation techniques and an increasing use of the terms object based image analysis and object oriented image analysis .

Object-based Image Analysis - GIM International

Object-based image analysis (OBIA) involves pixels first being grouped into objects based on either spectral similarity or an external variable such as ownership, soil or geological unit. Many variables may be determined, categorised as spectral, shape and neighbourhood. Examples of spectral variables are mean value and standard deviation of a specific spectral band; shape variables include

Image Classification and Object Based Image Analysis (OBIA)

Object Based Image Analysis utilizing Trimble's eCognition and other software programs has the ability to make smart class decisions based on spectral, shape, size and class relationships utilizing image objects (image objects are groups of spectrally similar pixels.) Object Based Image Analysis also has the ability to ingest and utilize temporal imagery and ancillary GIS data layers to make
