Low torque motors are best for off road as they allow for controlled and plentiful power at low speeds. Without a gearbox though you will be relying on a the torque converter to mange things, so depending on how extreme you want to go off-road (flat dry dirt, rocky climbs, deep mud), the motor needs to be able to handle the weight and type of terrain. Off-road buggies come in several varieties, including racing vehicles and those ideal for recreational use. You can build them from kits or purchase them from factories, putting them together with minimal assembly. These vehicles feature a sparse layout with an open cabin and surrounding steel frame with roll bars, offering protection from side impacts and tipping. They operate much like cars.
