The 100 most cited spine articles - PubMed Central (PMC)

Articles discussing trauma (20 articles) and spinal deformity (4 articles) were also represented. The lumbar spine was the most common anatomic area reported with 53 articles. The other common anatomic regions included the thoracolumbar spine (17 articles), cervical spine (15 articles), and the entire spine (15 articles). Twenty of the top 100 articles discussed a new surgical technique or **Wound Closure After Posterior Multi-level Lumbar Spine ...**

Meticulous attention to wound closure in posterior lumbar spine surgery is an important principle in reducing surgical site infections. We detail standardized wound closure used for posterior lumbar spine surgery at a tertiary care referral center and illustrate this as a step-by-step cadaveric dissection. The lumbar spine of a cadaveric
