The market for Radio Frequency Identification (RFID) technology is expanding rapidly, constituting billions of dollars annually. As more organizations adopt RFID solutions and related equipment, the need to route, map, and execute workflows based on RFID data grows exponentially. Microsoft's solution to this demand is BizTalk RFID, an application built to distribute, track, analyze, and provide visibility into enterprise data collected using RFID technologies. To aid in the rapid

understanding and adoption of BizTalk RFID, this book's authors have joined together to present Pro RFID in BizTalk Server 2009, the definitive resource for unlocking the potential of the application.

**CHAPTER 8: Integrating with BizTalk Server - Pro RFID in ...**

BizTalk RFID and BizTalk Server are applications completely separate from one another. Because of this, integrating with the core BizTalk Server engine (including the MessageBox, ports, orchestrations, and other components) from BizTalk RFID is similar to integrating with any other external system or application.
