Radiotherapy uses high-energy rays to destroy cancer cells, while doing as little harm as possible to normal cells.

**Treatment decisions | Hodgkin lymphoma | Cancer Research UK**

Sometimes Hodgkin lymphoma does not respond as well to initial treatment as your doctor would hope. You might have more treatment, for example, radiotherapy as well as chemotherapy. Or they may change your chemotherapy drugs, or give you the biological therapy drug brentuximab.

**General Radiation Treatment | Lymphoma Canada**

**General Radiation Treatment** Radiation Unlike chemotherapy, which is a systemic (affects the whole body) therapy, radiation therapy is a localized therapy meaning that it only treats the area of the body where the cancer is located.

**Radiation Therapy for Hodgkin Lymphoma**

Radiation therapy is part of the treatment for most people with Hodgkin lymphoma (HL). It's especially useful when HL is only in one part of the body. For classic Hodgkin lymphoma, radiation is often given after chemotherapy.

especially when there's a large or bulky tumor mass (usually in the chest).

#### **Hodgkin's lymphoma - Wikipedia**

Hodgkin's lymphoma (HL) is a type of lymphoma in which cancer originates from a specific type of white blood cells called lymphocytes. Symptoms may include fever, night sweats, and weight loss. Often there will be non-painful enlarged lymph nodes in the neck, under the arm, or in the groin. Those affected may feel tired or be itchy.
