Oracle SQL temporary tables

The "on commit preserve rows" clause tells the SQL engine that when a transaction is committed the table should not be cleared. The global temporary table will be created in the users temporary tablespace when the procedure populates it with data and the DIRECT_IO_COUNT will be used to govern the IO throughput (this usually defaults

Oracle SQL materialize Hint

The SQL-99 "WITH clause" is very confusing at first because the SQL statement does not begin with the word SELECT. Instead, we use the "WITH clause" to start our SQL query, defining the aggregations, which can then be named in the main query as if they were "real" tables;
