The interest here is the immunology of materno-fetal relations, once a pregnancy has begun. Therefore, I will not cover immunological aspects of sterility, nor touch on the immunological approaches to controlling fertility, i.e., "contraceptive vaccines." 3. This is a book mainly concerned with pathogenesis.

Antigens are expressed by early human embryonic tissue (Loke 1978, p5), so it could be expected that the early human embryo would trigger an inflammatory response to rid the mother's body of the foreign body . The exposure to non-self paternal antigens on the fetus requires the adaptation of the maternal immune system to prevent the rejection of the allogeneic fetus without

Human Immunology publishes full-length, original, hypothesis-driven basic and clinical research articles as well as brief communications, reviews and editorials covering immunogenetics, transplantation immunology, autoimmunity, and immunity to infectious diseases in humans.

[Immunology of normal pregnancy - ScienceDirect](#)

The immune system has two defence systems: innate and adaptive (Figure 1, Figure 2). Traditionally the two are viewed as discrete, with the innate immune response being a non-specific reaction to foreign antigens, while adaptive immunity occurs in response to specific antigens.

[Immunology of Pregnancy | Gil Mor | Springer](#)

Immunology of Pregnancy is the first book to give a complete and up to date review of our knowledge related to the role of the immune system during pregnancy and the interactions between the placenta and the maternal immune system.

[An immune clock of human pregnancy | Science Immunology](#)

The multiplex functional readout afforded by mass cytometry provides unprecedented opportunities to describe the human immune system as a network of correlated, cell type specific attributes and to investigate the functional relationships between cells within and across hematopoietic lineages (15, 16).

#### **Immune Regulation in Pregnancy | Immunopaedia**

**Immune Regulation in Pregnancy Introduction** The maternal-foetal interface of the placenta is a complex microenvironment containing soluble and cellular regulatory factors necessary for the establishment and maintenance of a normal pregnancy.

#### **Immune tolerance in pregnancy - Wikipedia**

**Immune tolerance in pregnancy or maternal immune tolerance** is the immune tolerance shown towards the fetus and placenta during pregnancy. This tolerance counters the immune response that would normally result in the rejection of something foreign in the body, as can happen in cases of spontaneous abortion.

#### **(PDF) Immunology of Pregnancy - ResearchGate**

The principal role of the immune system is to defend the integrity of the host by preventing infectious disease, tumor development, and contamination of the host genome.

#### **REVIEW ARTICLE: The Immune System in Pregnancy: A Unique ...**

In other words, the immunology of pregnancy is the result of the combination of signals and responses originated from the maternal immune system and the fetal/placental immune system. The signals originated in the placenta will modulate the way the maternal immune system will behave in the presence of potential dangerous signals ( Fig. 1a,b ).

#### **Phenotypic characterization of normal human placental ...**

The placenta is a rich source of immunocompetent cells. We have studied the phenotype, number and origin of placental mononuclear blood cells isolated from 32 normal term placentae using 4 color flow cytometry.
