The Chemistry of Mesophase Formation

research into the chemistry of mesophase formation is the commercial up-grading of such pitches and the development of specialized pitches. Structure in cokes is described in terms of optical texture. The importance of viscosity of pyrolyzing pitch in controlling size of optical texture is stressed. Pitch viscosity itself is related to chemical composition of the parent material. Those rich in **The Mesophase Concept in Composites - bokus.com** Pris: 1169 kr. Inbunden, 1987.
