Tracheal deviation happens when your trachea is pushed to one side of your neck by abnormal pressure in your chest cavity or neck. The trachea, also known as your windpipe, is a tube made of

[Tracheal cancer \(cancer of the windpipe\) - Macmillan](#)

...

Tracheal cancer starts in the windpipe (trachea). It's rare, and the exact cause isn't known. Smoking is linked to the most common type of tracheal cancer called squamous cell cancer, but doesn't cause other types. If your GP thinks your symptoms could be caused by cancer they will refer you

[Tracheostomy](#)

Tracheostomy Tracheostomy (sometimes called tracheotomy) is the creation of an opening directly into the trachea (windpipe) in the neck for the purpose of assisting breathing. While tracheotomy used to be done as an emergency, it is now done more on an elective basis to protect the airway, better clean the airway and to provide more oxygen to the lungs.

[Tracheal and ...](#)

Thoracic malignancies are major, global health problems. Lung cancer is the most common cancer and cause of cancer death in the world, with more than 1.5 million deaths per year. More Americans will die from lung cancer each year (approximately 159,480) than from colon, breast, pancreatic, and

[Trachea - Wikipedia](#)

The trachea, colloquially called the windpipe, is a cartilaginous tube that connects the pharynx and larynx to the lungs, allowing the passage of air, and so is present in almost all air-breathing animals with lungs. The trachea extends from the larynx and branches into the two primary bronchi. At the top of the trachea the cricoid cartilage attaches it to the larynx. This is the only complete tracheal

ring, the others being incomplete rings of reinforcing cartilage. The trachealis muscle joins
